About us...

IT WASH Srl was founded in 2000, as a final step of a project began in 1970, out of tenacity of its founders Mr. Elia Izzo and Mr. Ciro Tarallo who decided to bring together, in a new ambitious challenge, more than 30 years of experience acquired on the engineering and production of components for leading companies of white goods industry.

A deep knowledge of the product, an accurate control of the details, the choice of first level European suppliers and a fully verticalized production system are among the key factors of It Wash success. The acquisition of SANGIORGIO brand in August 2014 was just a completion and exaltation of the work done.

Today washing machines and heat pump dryers are produced from raw materials on a production site of 145,000 square meters using the latest generation equipment, according to the fourth industrial revolution (4.0 Industry).

The constant growth on production volume and the increased market share over the last years, has allowed It Wash company to shed light again on the historic SANGIORGIO brand with an entirely Made in Italy products whose strengths are quality, innovation, simplicity and reliability.

History

The electro-domestic company San Giorgio S.p.A. was founded in 1954 in Genoa, following the liquidation of Sangiorgio, a subsidiary of *Finmeccanica*.

The plant stood out from the start for the quality of its products and the innovations made in different types of appliances. After the success of the early years, SanGiorgio acquired very important segment of the market share making the washing machine for domestic use its core business.

Sangiorgio products, at light of their quality and reliability over time, become, in a short period, the reference point for the whole world of "white goods". Over the years SanGiorgio changed ownership several times, ending up even abroad, but in 2014 it finally returned to Italy.

In fact, ITWASH, a completely Italian company, already established in the production of washing machines for many Italian and European brands, acquires the Sangiorgio brand with great national pride offering to its customers quality products with high washing performance.

5 Clienti super per la super

la lavatrice che vi dice sempre

- SI lava con programmi differenziati tutti i tessuti (o solo)
- SI sceglie automaticamente il programma di lavaggio
- SI prelava e lava a tempi fissi o regolabili (con timer)

SANGIORGIO

Quality and Respect for the environment

Our appliances are not limited exclusively to the quality of the washing or drying, but also take care of energy saving. In order to provide the maximum performance respecting the environment.

Your children are safe

The child lock option preserves the setting of the washing program from any accidental changes such as those made by children.

The washing will end without interruption with children protected from domestic accidents

Washing drum “Pearl Drum”

Washing drum: “Pearl Drum”

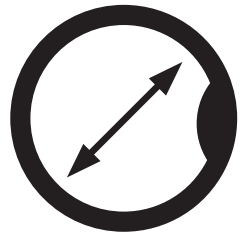

The new Sangiorgio range is equipped with the new “Perla” drum which, thanks to its convex surface, respects the delicacy of the laundry even at high spin speeds.

The “Pearl” design exerts a mechanical action on the fabrics which helps the stretching out of the fibres ensuring an excellent level of cleanliness. The drum is made of AISI 430 stainless steel. The steel has a combined high corrosion resistance with excellent sealing and reliability over time.

Big dimensions

The New Evolution 3 and F4 range offer large pearl drum in the higher category with a door opening diameter of 325 mm, which makes it easy to place the laundry inside the drum. The large internal dimension allow for a load capacity of up to 10,5 kg, guaranteeing the best washing performance.

F4 Star series

At the top of SANGIORGIO range, the F4 STAR is equipped with the innovative and super silent inverter motor to achieve the maximum level of washing efficiency on a very quiet environment.

The STAR is available with the following configuration:

- 7kg/1400 rpm and 8kg/1400 rpm with white porthole door type 8 and dark smoked cover.
- 9kg/1400 rpm and 10kg/1400 rpm with chrome porthole door type 8 and dark smoked cover
- 8kg/1400 rpm on silver or black color with chrome porthole door type 8 and dark smoked cover

Reliability, low consumption and high performance make the STAR a masterpiece of the entire SANGIORGIO range.

Spinning speed: 1000 rpm
Energy efficiency: D class
18 washing programmes + 2 washing options
Washing status indicator, anti-foam control and anti-spill control.

Technical Features

Hybrid timer
Net dimension
85 x 59.5 x 54 cm
Net weight
67 kg
Door diameter 420 mm
Drum diameter 470 mm
Maximum power - Current
2200W
220/230V 50Hz

Available options
Rinse hold
Spin reduction

Washing programmes

- Cotton - Prewash 90°C
- Cotton - Energetic 90°C

Essential G

An essential and price fighter range of products born from a combination of simplicity and efficiency.

These are the prerogatives of Essential G series with its classic and functional outline.

Available on 6kg and 7kg, 1000 rpm and on 8kg/1200 rpm.

Model: SG610
Type: G610

6 kg

1000 rpm

C Class

Energetic data

G610 - EAN: 8033675153766

Loading capacity: 6 kg (standard cotton)
Spinning speed: 1000 rpm
Energy efficiency: C class
15 washing programmes + 3 washing options
Washing status indicator, alarm indicator, overheat-
ing control, anti-foam control and anti-spill control.

Technical Features

LED technology
Net dimension
85 x 59.5 x 51 cm
Net weight
59 kg
Door diameter 420 mm
Drum diameter 470 mm
Maximum power - Current
2200W
220/230V 50Hz

Available options

Prewash
Extra rinse

Dryer project

Heat Pump Dryer

As Sangiorgio company we have been always close to our customer providing them with the perfect solution to their requests.

The efficiency of heat pump technology combined with the most advanced engineering solutions allows to perform a very delicate drying on your laundry.

Customers can choose different types of drying according to their needs:

“WARDROBE” to store laundry directly in the closet;

“EASY IRON” for an extremely easy iron

“ETRA DRY” to use the laundry immediately after the drying cycle

By using the humidity sensors placed inside the drum, the dryer measures constantly the moisture level of the laundry in order to guarantee the most efficient drying performance respecting the softness of the laundry.

Extremely soft drying system

Inside the innovative PEARL DRUM, specially designed for fabric care, the warm air generated by the heating pump unit, mixes gently with the laundry in a plenty of space available inside a generous dimensions drum. The result is excellent, the laundry is fragrant, soft and wrinkle-free.

“Produced and assembled entirely in Italy”

Made in Italy is an important plus that makes SANGIORGIO dryer unique in its field. Produced with latest production plant technologies according to the new Industry 4.0, which allows to monitor the production process on all its steps, from the raw materials to the finish product, to ensure the maximum level of quality and reliability.

Model: SDR8

How to reach us

By highway:

Traveling on the A1 highway between Naples and Caserta, take the Pomigliano-Villa Literno exit and at the next crossroads take Acerra direction.

Continue for about 3.5 km on SS7 bis and take the direction of Acerra Zona Industriale A.S.I. After having driven all through the entrance main road, turn left at the junction.

Sea port and Airport:

IT WASH is about 15 km from the Capodichino airport and from the port of Naples, 50 km from the port of Salerno. From both the sea port and the airport, take the motorway towards Rome and then follow the motorway signs as above.
